PROFESSIONAL SUMMARY

Incoming M.S Computer Science student with a strong foundation in software development and hands-on experience building backend and full-stack applications using Java, Python, C++, and JavaScript. Experienced in designing data-driven systems, implementing scalable application logic, and collaborating in team environments to solve real-world problems. Seeking Software Engineering internship opportunities to apply and further develop technical and problem-solving skills.

EDUCATION

University of Washington Bothell

Bachelor's, Computer Science

September 2021 - June 2025

GPA: 3.37

Seattle University

Master of Science (MS), Computer Science

September 2026 - June 2028

PROFESSIONAL EXPERIENCE

Pisayian

Backend Developer

October 2025 - Present

Remote

- Designed and implemented a backend tool for a non-profit alumni foundation to transform a single CSV input into multiple relational tables, reducing manual cleanup by ~95% through automated normalization and validation.
- Built end-to-end data processing pipelines using Node.js and Express.js, handling ingestion, parsing, transformation, and structured export of datasets.
- Implemented CSV parsing using PapaParse and generated ZIP-based batch outputs to streamline distribution of processed data.

MedTruly, Inc.

Office Assistant

April 2024 - October 2024

Renton, WA, USA

- Managed patient electronic health records, facilitated order placement for the clinic, efficiently sorted incoming mail, and provided seamless patient check-in services.

PROJECTS & OUTSIDE EXPERIENCE

Personal Website

Personal Website

- Designed and deployed a responsive personal portfolio site using React, Vite, TailwindCSS, and TypeScript, hosted on Vercel with a custom domain.
- Optimized frontend performance to achieve sub-1 second load times, delivering a fast and seamless user experience.
- Showcases 2 full-stack projects with structured navigation to highlight technical work and project details.

CareerPath

- Built a full-stack job tracking app using React.js and Firebase to manage job applications and interview workflows.
- Implemented resume parsing and keyword comparison features to evaluate candidate fit against job descriptions.
- Integrated Firebase Firestore, Authentication, and Cloud Storage to manage user data and uploaded documents securely.
- Developed a time-aware interview scheduler with automatic status updates and reminder logic.
- Followed an Agile development approach, iterating on features through planning, implementation, testing, and review.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript

Frameworks: React.js, Node.js, Firebase, Express.js, Vite, Tailwind CSS

Tools: GitHub, VSCode, Linux/Unix

Concepts: Documentation, Debugging, Test-Driven Development, Data Structures & Algorithms, Agile
